

Pool Lift

IGAT-180

In-Ground Automatic Turn 180°

Meets or exceeds requirements of the ADA, ABA and CBC.

-Automatic 180° Clockwise Seat Turn Standard (opposite turn available)

-Powered by Water Pressure -- lifts up to 400 LB. at 55-65 PSI while lifting or approx. 60 PSI static faucet pressure. *

-Vertical Seat Travel - 42"

-Installs in Deck Socket (Socket Cover included)

-Portable (Lift Out and Put Away)

-Flip-Up Footrest Included

-Can Be Padlocked in Seat-Up Position

-Allows Independent Operation

Our best-selling lift for most applications, the Model IGAT-180 meets all of the new recommendations and pending requirements of the Americans with Disabilities Act (ADA). It is user-operable, and its seat height is easily adjustable to accommodate various wheelchair heights. The 180 degree clockwise turn allows the greatest access from the deck for the user and any assistants. Side-to-side transfers are easy, the footrest flips up and the mounting arm is under the seat. This allows for unobstructed transfer. The seat rotates forward when entering the pool, and backward when exiting the water. The standard seat has a right arm only, but a flip-up outer arm is available. All components required for installation and operation are included in the price and ship with the lift, although many options and extras are available. Just let us know your needs when ordering.

Static pressure (measured at faucet or hose with no water flowing) is affected by variables in the material, length, diameter and rigidity of the water lines and hoses from the street to the lift, and by how many other faucets are open at the same time. Operating pressure requirement (measured while lifting) is not affected by these variables.

** Opposite facing (opposite turn) and heavy-duty units available (custom charges may apply).
